IPCC Hosts Exhibit, VoIP Technology Panels, and Service Provider Working Group Meeting at CompTel/ASCENT

ORLANDO, FLA.– Oct. 5, 2005 – The International Packet Communications Consortium (IPCC), the industry’s technology forum working to advance Voice over Internet Protocol (VoIP) over broadband cable, wireless, and wireline, announced today its presence at the upcoming [CompTel/ASCENT Fall 2005 Convention & Expo](#), which is scheduled for October 9-12 in Orlando, Florida at the Orlando World Center Marriott. At the conference, the IPCC will host an informational exhibit (#219), three VoIP technology panels, and hold its service provider working group meeting – all of which are open to CompTel/ASCENT conference attendees.

IPCC Chairman Michael Khalilian commented, “We’re pleased to support CompTel by hosting this important working group meeting on E911, and providing speakers to help educate CompTel members on issues surrounding the convergence of VoIP.”

IPCC Hosts VoIP Technology Panels Featuring IPCC Member Companies

IPCC will host three VoIP Technology panels on Tuesday, October 11 which feature a variety of perspectives from member companies on a several VoIP topics, including next generation operations systems and software, ENUM, SIP and VoIP interconnectivity, and migrating PSTN to SIP. The presentations will focus on successful deployments, ROI and technology information, as well as operational challenges. The following IPCC member companies will participate on the three panels that are one hour each, beginning at 8:30 a.m. through noon on Tuesday, October 11 in the Crystal Q Room at the Orlando World Center Marriott:

Tekelec	VoX Communications
Global Crossing	Trendium
SIPStorm	Kancharla
Bay Packets	Verisign
CopperCom	UTStarcom

**IPCC Service Provider Working Group Meeting on E911
to be Held October 11**

The IPCC will hold its Service Provider Interconnectivity Working Group Meeting on Tuesday, October 11. Open to CompTel/ASCENT conference attendees, this meeting will focus on E911, and feature a presentation from Staci Pies, VP, Governmental and Regulatory Affairs, PointOne, who will discuss the E911 regulatory environment.

The IPCC Service Provider Working Group Meeting will be held:

Orlando World Center Marriott
Chicago Room
1 p.m. – 2:30 p.m.

About the International Packet Communications Consortium (IPCC)

The IPCC is an international industry association dedicated to accelerating the deployment of voice over Internet Protocol (VoIP), video over IP technologies and services over converged wireless, wireline, and cable broadband networks. IPCC and its working groups are focused on the deployment and promotion of real-time services through educational forums, technical working groups, and industry conferences.
